Sika·Design®
HANDMADE FURNITURE

A proud tradition of craftmanship

Sika-Design is a Danish family company established in 1942. With a passion for rattan and great craftmanship, we manufacture timeless furniture in both our own designs, and in designs by some of the world's greatest designers and architects.

We are proud to call us the oldest manufacturer of rattan and wicker furniture in Scandinavia. Our history began with rattan but for almost 20 years we have also been manufacturing outdoor wicker furniture based on the same great craftmanship.

Creating long lasting furniture

With 3rd generation Louise Andreasen in charge, our mission is to make long lasting furniture. These should be created with the least possible impact on the environment which places great demands to the longevity of our designs, the way we produce, and the materials we use.

Our Exterior furniture is made of aluminum and ArtFibre. The aluminum is partly recycled, and selected items are made using recycled ArtFibre. In our production there is minimum waste as ArtFibre residues can go back into the production and all aluminum scraps are collected and recycled. We believe in the importance of using recyclable materials and the importance of using them in a way that enables further recyclability in the future. Therefore, our Exterior furniture can be taken apart after end use and sorted into clean, recyclable materials.

Social & environmental responsibilities

Taking environmental and social responsibilities are ongoing processes that we have been working systematically with since 2013. Together with our sister company, we were the first furniture companies in Denmark to be certified with an ISO14001:2015 and SA8000 (now replaced by SMETA by DNV). Through our certifications, we have committed ourselves to a responsible social - and environmental policy as well as an ongoing focus on developing and improving these conditions.

3 generations
WITH A PASSION FOR RATTAN

Sika-Design is a true family company with 3rd generation, Louise Andreasen, in charge. The story of Sika-Design began in 1942 when Ankjær Andreasen produced the first batch of smaller interior items made of rush and willow, and since then the family has continued his legacy.

Knud Andreasen, Ankjær Andreasen's son, took over the company in 1983, and Ankjær continued his daily inspections until his death in 1997. Since 1996 Louise and Knud have worked side by side bringing Sika-Design into the new century with great designs, while never letting go of our strong heritage of great craftsmanship.

In 2013 Louise Andreasen took over the company and became CEO of Sika-Design. Knud is still working in the company and is an important asset, as he is continuingly passing on the Sika-Design company culture and heritage to the next generations.

Exterior

ICONIC DESIGNS MADE FOR EXTERIOR USE

In our Exterior collection you will find iconic designs from some of the world's greatest designers and architects as well as our own original designs with some of them dating back to the 1950s. Many of the furniture in this collection was originally made in rattan but for our Exterior collection these are made in Aluminum and ArtFibre® making them resistant to all kinds of weather.

Our Exterior furniture is based on the same great craftsmanship as our indoor collections. The aluminum frames are bend by hand, powder-coated and handwoven with our own extremely durable Sika-Design ArtFibre®. Some of the furniture is further painted by hand inspired by natural rattan. In this way you can get the beautiful rattan look for your exterior furniture.

TOBIAS TABLE

Arne Jacobsen

Arne Jacobsen (1902-1971) was revered as one of the most visionary and progressive Danish architects of his time. Arne Jacobsen was admitted to the Architecture School at the Royal Danish Academy of Fine Arts from 1924 to 1927. Still a student in 1925, he participated in the Paris Art Deco fair, Exposition Internationale des Arts Décoratifs et Industriels Modernes, where he won a silver medal for his first furniture design.

In 1929 Arne Jacobsen won a Danish Architect's Association competition for designing the famous "House of the Future" where the Paris lounge chair was displayed as a part of the interior design.

TABLE

Paris Chair | Item no: AJ-E33-NAT

Paris

BY ARNE JACOBSEN

The Paris chair was designed by Arne Jacobsen in 1929 for a competition published by The Basket Makers Association. When he later the same year exhibited with the famous "The House of the Future", the chair was displayed as a part of the interior design. Until World War II, the chair was produced by Robert W. and is known both as Fremtidens Stol (*The Chair of the Future*), Skovsneglen (*The Forest Snail*) and the Paris Chair.

St Catherine Bench | Item no: AJ-180U

St Catherine

BY ARNE JACOBSEN

The St Catherine teak bench was designed by Arne Jacobsen in 1935. The bench was part of his first major project abroad where he designed the St Catherine's College Oxford and the college park. Arne Jacobsen had a great interest in landscape and nature, and often said "If I had a second life, I would be a gardener".

Rita

The Rita dining chair was designed by Nanna Ditzel in 1965. The playful and unconventional legs of the sculptural chair enable it to stand on all outdoor surfaces without the legs digging into the ground.

Nanna & Jørgen Ditzel

Nanna Ditzel (1923-2005) was an internationally recognized Danish designer. Together with her husband Jørgen Ditzel (1921-1961), their first furniture designs were exhibited while still students at the Arts and Crafts School in Copenhagen.

They quickly established their own design studio and started to work with wicker in the renowned workshop founded by the famous wicker worker Robert W. in 1950. Ditzel's experimental approach to materials resulted in multiple innovative furniture. Most known is their Hanging Egg chair that has enjoyed praise worldwide ever since the distinctive sculptural shape was created by Nanna & Jørgen Ditzel in 1959.

CHILL CHAIR

1965

RITA CHAIR

Chill

BY NANNA DITZEL

The beautiful Chill lounge chair with complementary footstool was designed in the late summer of 1961. Chill is an almost sculptural installation that effortlessly integrates body and furniture. The chair along with the footstool tie an organic design language with minimalistic features and invite to pure relaxation.

The original name of the chair was Kaminstolen (*The Fireplace chair*) and it was used in Nanna Ditzel's private vacation home for more than 40 years.

Chill Chair | Item no: ND-E25-NAT

Madame Chair | Item no: ND-E44-NAT

Madame

BY NANNA & JØRGEN DITZEL

In 1951 Nanna & Jørgen Ditzel designed the Madame chair. The couple were known for their experimental approach to materials which led to many groundbreaking designs and is this case an elegant chair with soft and feminine shapes - hence the name Madame.

Robert W.

Robert W. (1825-1902) was known as the best wicker maker in Denmark and was appointed royal court purveyor. Many architects came to his workshop to get knowhow and understanding about weaving and wickerwork. Among those were Danish architects Arne Jacobsen, Viggo Boesen, Nanna & Jørgen Ditzel and Kay Bojesen. They all had prototypes made in Robert's workshop in Copenhagen.

Robert W. was a pioneer in rattan production. What he did to the craftsmanship and the way he challenged the material lays the groundwork for the way we know rattan furniture today.

Jin Kuramoto

Jin Kuramoto (1976-) is a Japanese designer who graduated from Kanazawa College of Art in 1999. Despite his young age, Kuramoto has already received international recognition and numerous awards including the Red Dot Award, Good Design award and the iF Product Design Award.

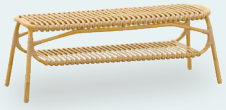

With an experimental approach to design, and a great respect for the unique inherent properties of each material, Kuramoto tells a story through each of his designs ranging from automobiles, eyewear and furniture.

The Machiya furniture is inspired by the traditional wooden townhouses found all over Japan. These townhouses are built side-by-side, making them space efficiently, and with characteristic wooden lattices on the facade. Through beautiful lines and a smart storage shelf these features are implemented in the Machiya furniture.

Franco Albini & Franca Helg

Franco Albini (1905-1977) was an Italian architect and designer, famous for his ability to merge modern minimalistic furniture design with traditional Italian craftmanship. Through his work he obtained three Compasso D'Oro awards, the most prestigious Italian design prize.

From 1951 Franco Albini becomes business partners with Franca Helg (1920-1989), and from this point Franca plays a crucial role in numerous of Franco Albini's designs. Franco and Franca were active both in the field of furniture, architectural planning and in industrial design. Together they designed many creations with the new forms of modernism.

BISTRO BENCH

Belladonna & Ottoman

BY FRANCO ALBINI & FRANCA HELG

In 1951 the Italian duo Franco Albini & Franca Helg designed the Belladonna sofa and the Ottoman. The construction of the sofa makes it seem like the seat is placed on a pedestal, giving the sofa an almost majestic aura. The beautifully curved back and fine open weave further enhance this elegant expression. The iconic Ottoman can be used both as a seat and as a side table. The Ottoman is distinguished by its sculptural lines, making it a decorative element wherever it is placed.

Belladonna Sofa | Item no: FA-E90-NU

Ottoman - Small and Big | Item no: FA-E15-NU & FA-E16-NU

Tove Kindt-Larsen

Tove Kindt-Larsen (1906-1994) was one of Denmark's most prominent designers from the 1930s to the 1960s. Tove was trained at the Royal Danish Academy of Fine Arts in Copenhagen and had a high sense of quality and an appreciation of current trends.

Many of Tove Kindt-Larsen's designs were inspired by shapes found in nature, and she is especially known for her work within architecture, silverware, textiles, and for the pioneering work she did with rattan.

Viggo Boesen

Viggo Boesen (1907-1985) was a Danish architect who contributed to the Danish design aesthetics in the 1930s. From his workshop, Viggo designed several rattan and upholstery furniture. All his furniture was designed according to his philosophy: Furniture should have an organic flow and embrace the body smoothly and tenderly. They should be a delight to the eye, but also be solid and durable.

The Fox chair was the first of many furniture pieces from Viggo Boesen and with that he won the design competition held by the Danish wicker-maker guild in 1936. His inspiring, imaginative designs made him unique and put him among the designers of the "Danish Golden Age."

FOX CHAIR

1936

TEDDY CHAIR

1936

TEDDY FOOTSTOOL

Teddy

BY VIGGO BOESEN

The Teddy lounge chair was designed by Viggo Boesen in 1936. The name of the lounge chair both refers to the appearance of the chair as well as the feeling when leaning back into the embracing chair. In the same iconic design, you find the matching Teddy Exterior Footstool adding extra comfort to the chair.

Customized cushions specifically developed for the Teddy furniture are available in a selection of colors.

Smilla & Ellis

Our Ellis and Smilla baskets are handcrafted in ArtFibre® for all-year outdoor use. When designing the baskets, emphasis has been on creating the most amazing shape in a quality that can last for many years.

The baskets are handcrafted in 70% recycled ArtFibre and 30% new ArtFibre. ArtFibre® is our own specially developed fiber made of hard-wearing polyethylene. This material is also used for our exterior furniture and can withstand rain, cold, heat, UV-rays and even snow.

Georgia Garden

CHARMING DESIGNS FOR LIFE UNDER THE OPEN SKY

The Georgia Garden collection is inspired by the British colonial style, and the designs are based on old drawings found in books and postcards. The collection is classic, cozy, romantic and perfect for long afternoons in great company.

Georgia Garden is made of strong and maintenance-free synthetic ArtFibre® handwoven on aluminum frames using traditional techniques. This means that the furniture will stay beautiful outdoors year after year.

Alu Affäire

INSPIRED BY PARISIAN ATMOSPHERE

The Alu Affäire collection is designed for cafés and restaurants, and is inspired by the colorful bistro chairs seen all over Paris. The furniture in this collection is designed by Sika-Design with some of the designs dating back to the 1950s and 1960s.

The Alu Affäire furniture is hand bend in Aluminum and woven with ArtFibre®. These strong materials can withstand both rain, snow, heat and UV-radiation, and can therefore be used outdoors all year round. The furniture is maintenance-free leaving more space for quality time.

Bistro

DESIGNED BY FRANCO ALBINI & FRANCA HELG

The Bistro furniture was designed by Franco Albini and Franca Helg in the 1950s. The furniture is both elegant and rich in detail. The curved details under the seat smoothly turns into an armrest which subtly reveals that there are skilled architects behind the design.

Our iconic designers

At Sika-Design we are very proud to collaborate with some of the world's greatest designers and architects.

These include current as well as older iconic designers and architects with the common trait of being pioneers of their time. They all share a fascination of rattan and the endless and uncompromising possibilities that rattans strength and flexibility enable. We share this fascination and when acquiring rights for old iconic designs it is important for us to work closely with the descendants to ensure the design and quality of the furniture, so they can continue their entitlement in the design world.

Downloads

On our website you can access our Downloadcenter. In here, you have access to high-resolution images, manuals, datasheets, 3D files and much more. A login is not required.

Images in high resolution

Images of all products both packshots and lifestyle can be found in high resolution. Packshots with shadows can also be found in web-format.

3D Files

Our 3D models are available for download at our website in OBJ, DWG, STP & SKP formats, and can be made in other formats on request.

Datasheets

We have datasheets available for all furniture models. The datasheets contain relevant information about the furniture, and are available as PDF.

Fabric color & styles

Fabric styles and colors are available as downloads in our Downloadcenter. They are divided into indoor and outdoor collections.

Color & material sheets

For each collection we have a sheet with a color and material overview. They are available as high resolution PDF's and are easy to print.

E-Catalogues

Catalogues are available on our website as iPapers. They are also available as PDF's in Downloadcenter and can be downloaded in high and low resolution.

Teak tables & tops

Teak wood is known for its high strength and durability. Due to the wood's natural oil content, it is very resistant to wind and weather, insects, and rot. Our outdoor teak products are made from new teak sourced from plantations overseen by the Indonesian government, ensuring that no tree that is too immature or too small is cut down.

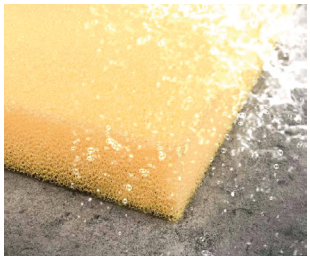

All our teak products are labeled Indonesian Legal Wood and is SVLK certified. This ensures that the wood has been sourced responsibly and can be traced back to the original sender.

MAINTENANCE Over time teak furniture exposed to sun and rain will turn grey. Teak furniture requires no maintenance but if you want to preserve the dark brown color, the teak must be treated with oil or teak sealer.

Tempotest fabrics

Our Italian Tempotest® fabrics are treated with a special type of finish. During the treatment process, the finish is deposited not only on the surface of the fabric, but envelopes each individual fiber. This forms an impenetrable barrier without compromising the fabric's breathability. It is also rotting proof and immune to the formation of mold and fungus.
The HI-Clean finishing makes Tempotest® fabrics water and oil repellent. The fabrics can be machine washed at 30° degrees.

QuickDry foam

QuickDry foam is an advanced, high-performance foam engineered specifically for outdoor use. QuickDry foam is exceptionally porous and drains water rapidly while circulating air with optimal efficiency.

This high-quality foam keeps it shape, ensures optimal comfort and has in-built antimicrobial protection.

Alu-Rattan

Alu-Rattan is aluminum which has been developed to resemble rattan and its unique shaping ability. Alu-Rattan is used in our Exterior and Alu Affäire collections where it is powder coated leaving a smooth finish and a vibrant color. The furniture is well-suited to be left outside all year long. It is easy to clean and is maintenance free.
MAINTENANCE: Wash with water mixed with mild soap and remove stains with a sponge or medium brush.

ArtFibre®

ArtFibre® is used in the Exterior, Alu Affäire and Georgia Garden collection. Our ArtFibre® is made of dyed hard-wearing polyethylene. It is ideal for outdoor use in any climate as it is temperature and UV-resistant. ArtFibre® is flexible and provides optimal comfort when woven. It has a strong structure that can maintain its shape for years.
MAINTENANCE: Wash with water mixed with mild soap and remove stains with a sponge or medium brush.

Glass tops

Our glass tops are made from 8 mm tempered glass. They are easy to clean and more durable than ordinary glass. It is important to handle it with care. A damaged edge or scratched surface can in exceptional cases cause the glass to crack suddenly. Avoid collisions from the side where it is most vulnerable.
MAINTENANCE: Wash with water mixed with mild soap and remove stains with a sponge or medium brush.

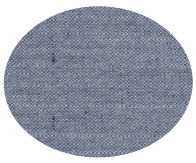

Versalite tops

Our versalite table tops are easy to maintain because of its smooth, scratch free and hygienic surface. These table tops are strong and stable. They are also resistant to all weather conditions which makes them the perfect choice for restaurants and hotels.

MAINTENANCE: Wash with water mixed with mild soap and remove stains with a sponge or medium brush.

Upholstery & cushions

Since the 1950s we have developed customized cushions for our furniture. Therefore, we draw on great experience and expertise when deciding the shape and characteristics of each cushion.

Our cushions are made with high-quality foam ensuring that the cushion keeps its shape and offers a great sitting comfort. A selection of our exterior cushions is available with Quickdry foam. Quickdry foam has an exceptional ability to drain water while circulating air, and therefore these cushions can withstand even heavy rainfall. We also offer cushions with fire-retardant foam. Be aware of additional delivery time and extra cost.

Our upholstery and seat cushions can be chosen from a broad variety of high-quality fabrics and styles. We also offer custom cushions using the customers own fabric. If you have a special request or a specific need, please contact us.

All our fabrics have a wear resistance of minimum 20.000 Martindale.

Custom fitted covers by Dryboy™

In collaboration with the Swedish company Dryboy™, we offer customized covers for a selection of our outdoor furniture.

All covers are made in Gothenburg, Sweden, and are sewn in a unique Oeko-Tex® certified polyester that is PVC-free, with a five-year guarantee on the covers' waterproofing. The covers are custom fitted in high quality, and available in two colours, Dark Grey and Sand.

The covers can only be purchased at Dryboy. View selection at:

Environmental responsibilities

As a manufacturer of furniture, we believe that our greatest positive impact is done by creating furniture in a quality and design that can last for generations, and thereby eliminate the need for frequent replacements.

For several years we have worked systematically with making responsible changes. Consideration for the environment affects which models we put into production as well as our choice of materials, how they are processed, and how the furniture is packaged and transported.

A continuous process

When working with new responsible initiatives we always use our common sense. The new initiatives need to make sense – and make a real difference. We do not wish to use more recycled materials if this means that we need to transport the materials from far away or if it compromises our high demands for durability. It is truly a balancing act, and we are continuously doing our best to keep this balance.

All waste from our production is collected and recycled. We do this because it is common sense but also because it is an unavoidable part of Indonesian culture. ArtFibre waste goes back into the production, and aluminum waste is sold back to the supplier who recycles the scraps. We believe in the importance of making furniture of recyclable materials. Therefore, our exterior furniture after end use can be taken apart and sorted into clean, recyclable materials.

Since 2013, we have been certified by ISO14001. Through this certification, we have committed ourselves to a responsible environmental policy as well as an ongoing focus on exploring new possible ways to develop and improve our business.

Our social responsibility

We are SMETA-certified and have worked systematically with social responsibility since 2013. A SMETA certification does not have a natural expiry date, but we have chosen to be re-certified every two years to ensure our employees' working environment and to continuously keep ourselves up to date on possible improvements.

Our own factories, as well as our other business partners, are regularly audited. For all facilities, we have the same demands, namely that they must be managed in an environmentally and socially responsible manner - and we continuously improve in all areas.

Read more about our certifications and commitments below.

We are a part of the UN Global Compact. This is a voluntary commitment to implement universal sustainability initiatives based on 10 principles in the areas of human rights, labor, environment, and anti-corruption.

Sika-Design is certified ISO 14001:2015 by DNV. This international standard sets a framework for us to continuously protect the environment and respond to changing environmental conditions in balance with socio-economic needs.

Sika-Design is audited by DNV: SMETA (Sedex Members Ethical Trade Audit). This is the world's most commonly used ethical audit format and helps us on a continuous basis to ensure labor standards, health and safety for the employees in our supply chain.

As a manufacturer of furniture, we believe that our greatest impact comes from addressing UN Sustainable Development goals no. 8 and 12. By working systematically with ensuring a responsible consumption and production we work towards a better future.
